GALAXY PRODUCTIONS: YOUR LED VIDEO WALL EXPERTS

Uncertain about using LED video walls for your event? We're here to make it clear!

Simplified Sizing:

Large panels (roughly 20" x 40") are double the size of standard panels. We offer various configurations to perfectly fit your needs.

Quality Explained:

Pixel pitch determines quality - lower numbers mean higher resolution. The standard is 3.9 pixels, while 2.9 or less is considered top-notch. Outdoor panels prioritize brightness and typically use 3.9 pixels.

Power Up Your Event (Without a Generator!):

Most venues have sufficient power (6 dedicated circuits). Additionally, dimming the panels reduces energy consumption. In some cases, four dedicated 20-amp circuits (without GFCI) might be enough. If the location has cam locks or a power distribution box, a generator is likely unnecessary.

Content Options:

Dazzling Animations: We boast a vast library of animation files with various themes and colors to customize your display.

Memorable Montages: Showcase photos and videos on our video walls to create a lasting impression.

Live Simulcast (Additional Charge): Elevate your event with a live feed displayed on the video wall.

We're Here to Help!

Have questions about LED video walls? We're happy to educate you, even if you don't choose Galaxy Productions.

Your Guaranteed Best Value:

We offer unbeatable LED video wall and video mapping experiences.
